# THE UNIVERSAL CONSTANT

---

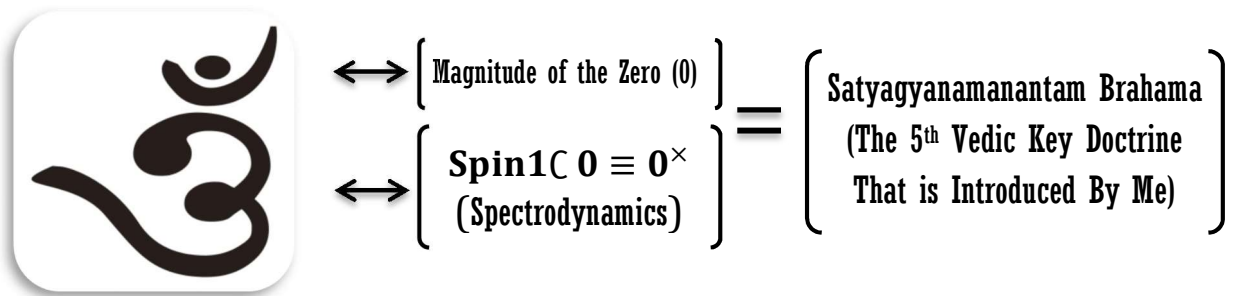

# THE UNIVERSAL CONSTANT

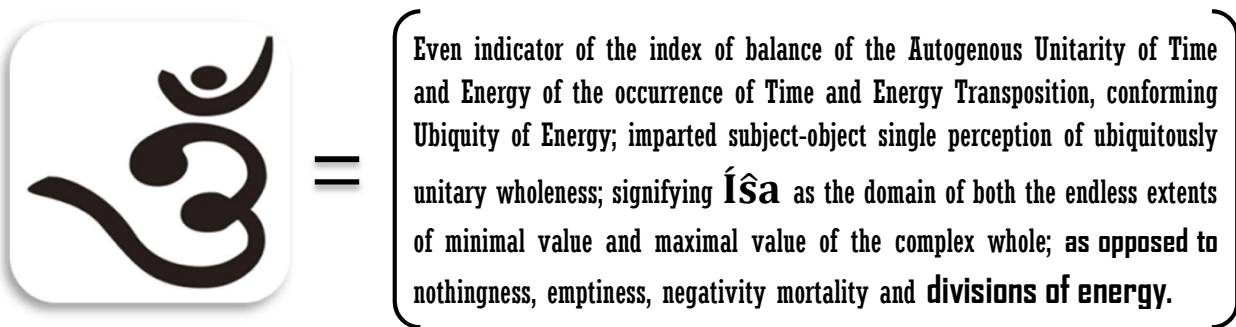

## THE SENSE:

## THE SIGN:

## THE SEAL OF BĒDA:

## THE UNIVERSAL CONSTANT:

The thing that is characteristically constant by the quality of being both subset and superset, encompasses both the endless ( $\infty$ ) extents of tiniest and vast and acts as the **sole factor** of the atomic exchange of energy, significantly holding universal energy as constant, is validating itself as immortal. The immortality characterises the thing as universal constant.

The science of the sense, sign and seal of the BĒDA are significantly validating immortality of Íŝa as Universal Constant, in conformity with **Time Dimension**.

**Intellectual Justice of the Author**  
**in regard to Immortality and Science of Íŝa as the Universal Constant**

# THE UNIVERSAL CONSTANT

## AUTHORIAL STATEMENT:

The immortal Íŝa ubiquitously acts as the **sole factor** of the atomic exchange of energy, significantly holding universal energy as constant, encompasses both the endless ( $\infty$ ) extents of tiniest and vast in conformity with Time Dimension. The indivisible Zero (0) epitomizes Íŝa as mathematical connotation as well as mathematical law of the atomic law of energy exchange, being index of balance as continuant by the way of both subset and superset encompasses both the endless ( $\infty$ ) extents of tiniest and vast, in conformity with the decimal method of mathematics as per mathematical law.

## THEREFORE:

Subatomic particles have no validity of existences, consequential to neither any definite value of energised mass as both superset and subset as per immortality nor mortality rate of the subatomic particles, resulting pseudoscience.

## NOTE:

Science discreetly originates and epitomises mathematics to define itself. That's mathematical law. Mathematical law differentiates science from pseudoscience where indivisible Zero (0) as neutral is the glaring example of mathematical law.

My research work on Bēda is principally functioning as my intellectual justice against pseudoscience of mass energy relativity and subatomic particles.

## RECIPROCAL LINK:
